

Nouman Mastery – Crypto Scanner User Guide

Introduction

This scanner is designed to help traders identify high-potential crypto coins before they become top gainers. It combines volume, ranking, and momentum to generate smart signals.

Step 1: Setup

Go to Nouman Scanner menu → Save API Key → paste your CoinMarketCap API key.

Step 2: Refresh Data

Click Nouman Scanner → Refresh Scanner Now. The system will fetch latest crypto data automatically.

Step 3: Understand Signals

Scalp Watch = Strong opportunity for short trades.
Watch = Keep in watchlist.
Avoid = Do not trade (already pumped or weak).

Step 4: Entry Process

Select pair in Open Trades.
Enter Entry price, SL, and TP.
System will automatically calculate PnL, status, and results.

Step 5: Risk Management

Never risk more than 1% per trade.
Use stop loss on every trade.
Avoid overtrading.

Step 6: Best Strategy

Wait for pullback → confirm support → enter trade.
Avoid chasing pumps.
Follow trend + confirmation.

Automation

Use Create/Reset Trigger option to enable auto refresh every 5 minutes.

Golden Rules

1. No confirmation = No trade
2. Late entry = Loss
3. Discipline = Profit
4. System > Emotion

Final Message

This system does not guarantee profit, but it helps you trade with structure, discipline, and better timing.
